Physical Presence Test

Foreign Earned Income Exclusion | Tax Year 2025

Insufficient evidence to establish the threshold

329

Recorded full foreign days in the strongest supported candidate

330 full foreign days are required. Unresolved dates could change this result; a failed supported count does not establish conclusive failure.

Strongest supported candidate — not a qualifying period

January 1, 2025 to December 31, 2025

365 calendar days: 329 recorded full foreign days and 36 unresolved days. Unknown days count zero toward the threshold.

Evidence to resolve

Classification	Dates / count
Recorded full foreign days	January 1 to November 25, 2025 / 329
Unresolved within candidate	November 26 to December 31, 2025 / 36

No U.S. visits or other exceptions were supplied. Their absence is not evidence of foreign presence.

Tax-year coverage

No qualifying-period coverage established

The supported coverage is 0/365. A percentage is omitted here because the evidence is incomplete; this result does not establish ineligibility.

Preparer next step

Confirm the unresolved full foreign days, arrival/departure dates and transit facts before reassessment. One additional supported day in this candidate would reach 330.

Foreign tax home and broader FEIE eligibility remain unverified. Eligible income and exclusion amounts are not calculated.
